

## PETROF at DesignBlok

*The company PETROF, spol. s r.o. presents the project „PETROF Colours“ to the public on the occasion of this international design show.*

*Visitors will have the opportunity to see PETROF's „studio“ with an acoustic instrument in non-traditional colour in the Museum of Decorative Arts in the Old Town from 6<sup>th</sup> October until 10<sup>th</sup> October.*

The project PETROF Colours started in spring 2021, when well-known **pianists from all over the world** sat at **colourful upright pianos**. They play covers of famous compositions and their own songs on distinctly coloured upright pianos PETROF in minimalist, pure white environment. You can watch all the videos made so far on our **YouTube** channel Petrof Pianos – official.

So far, **Yuval Salomon** (Israel), **Thomas Krüger** (Germany), **Karim Kamar** (UK) and Slovak pianist **Norbert Daniš** filmed with us. We will publish videos of other attractive artists such as **Gamazda** (Russia), **Jan Veselý** (Czech Republic) and several others until the end of this year.

The public can look forward to unique experience of combining visual minimalism, talent of pianists from different countries and that much popular romantic sound of PETROF pianos.

The company PETROF wants to strengthen this way the position of acoustic pianos as a part of modern music.

Visitors of DesignBlok can try **the resonator from PETROF workshop** and also compete for it. It is possible to participate in the competition via QR code, which links to the **e-shop** of company PETROF with a competition question. We will draw one winner from submitted correct answers, who will receive a wooden amplifier.
